# How to Program & Use the Wexford School App

When you open the App it will automatically display the current date. For the purpose of this How To this will be referred to as the Home Screen

By clicking on this Circle Cog Icon you can enter your child's semester 1 & 2 timetables (hint – this is the first piece of paper to go missing)
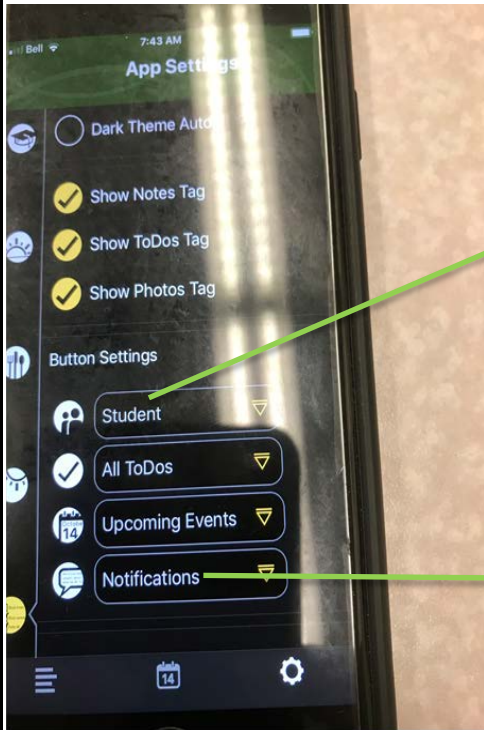

This is the screen that will appear after you click on the circle cog

Type in your child's semester 1 & 2 timetable. You can even colour code it!

To customize the top tool bar on the Home Screen you will click on the bottom left icon.

This will allow you to select student – if you have more than one child attending Wexford

This will also allow you to select notifications

This is the screen that will appear after clicking on the bottom left icon.

To customize the tool bar on the first screen select from the four drop down menu options

By selecting student it will allow you to enter the information for more than one child attending Wexford
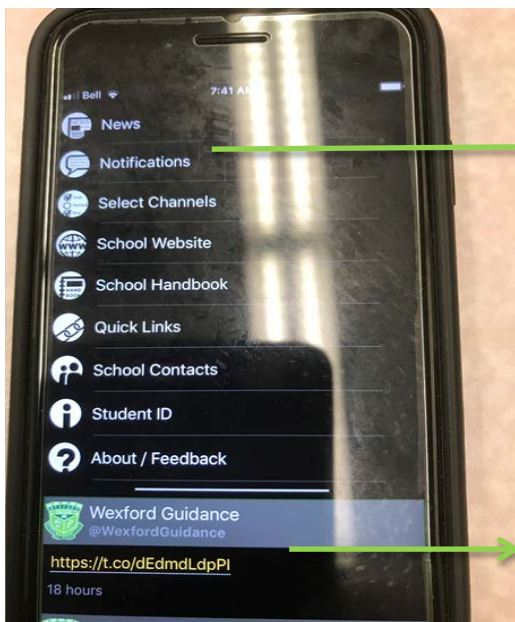

By selecting Notifications you will have easy access to the communications sent out by your child's teachers and coaches.

By selecting the student icon from the Home Screen you will be able to input information for more than one child/student
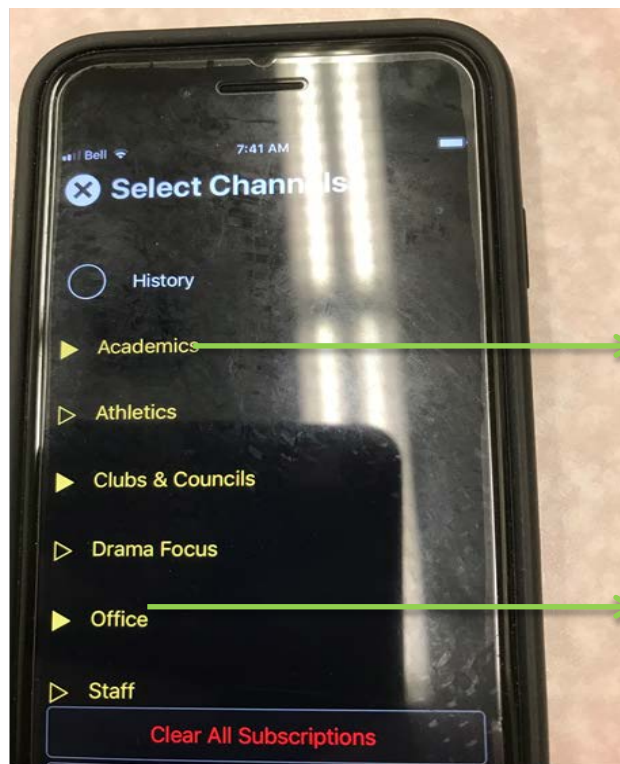

By selecting the bottom left icon on the Home Screen you will be taken to a Menu Options Screen

Select the Notifications tab to take you to the menu options that will allow you to select notifications from teachers, coaches and the main office

Running tab of all Guidance Twitter Posts appears at the bottom of this screen.

Select the Academics tab to see the drop down menu of all the teachers/classes. You are going to select the teachers of your child

Select the Office tab to select notifications from the main office, guidance or student success
